GPS III Plus

Package includes:

- GPS III® Plus receiver with detachable antenna
- Basemap: [Americas Highway](#) or [Atlantic Highway](#)
- PC interface cable
- Velcro mount
- Wrist strap
- User's manual
- Quick reference card

Garmin's new GPS III Plus offers cartographic capabilities formerly found only in high-end automotive navigation and marine chartplotting units. Simply plug it into a PC and download an extra 1.44 MB of map data from Garmin's line of [MapSource®](#) CD ROM's to give you instant detailed maps.

Whether you're cruising the streets or pounding the waves, Garmin has the maps you need. Choose the [U.S. Roads and Recreation](#) CD for city street level detail and even inland marine features such as lake and river shorelines, boat ramp and marina locations. Other CD's give you worldwide coverage of coastlines, including a database of coastal cities, nav aids and inland roads.

Even without additional cartography, the basemap in the GPS III Plus will get you where you're going. More than 10,000 new towns have been added to the permanent basemap, as well as airport locations, secondary roads in metro areas and even detailed exit information for the federal interstate highway system, including information about available lodging, food and service stations.
